

MANASA JAYAPPA

San Francisco, CA | 408-422-7939 | manasa.jayappa@gmail.com | <https://manasajayappa.github.io/>

PROFESSIONAL SUMMARY

MBA candidate and technology professional with experience supporting customer-facing web and mobile programs across Apple and Morgan Stanley/E*TRADE. Background spans software QA/testing, cross-functional program delivery, and product-focused execution in complex enterprise environments. Product Management and AI Product certified, with entrepreneurial experience developing a self-funded apparel brand from concept to pre-launch. Focused on building products that align customer needs, technical execution, and business strategy.

KEY ACHIEVEMENTS

Improved Delivery Predictability	Strengthened Production Quality	Reduced Defect Recurrence
Reduced delivery delays by 20% through Agile sprint planning, backlog coordination, and release management for Morgan Stanley/E*TRADE.	Supported Apple Store App releases achieving 99% production quality through release-readiness reviews, risk tracking, and cross-functional coordination.	Reduced defect recurrence by 20% through structured test planning and SQL-based backend data validation at Infomatrix Global.

EDUCATION

Santa Clara University - Leavey School of Business Master of Business Administration (MBA) CA Jun 2026 - 2028 <i>Expected Graduation: June 2028</i>	
BMS Institute of Technology Master of Computer Applications (MCA)	Bengaluru, India 2016
Mangalore University Bachelor of Computer Applications (BCA)	Mangalore, India 2013

CERTIFICATIONS

Product Management Certification (PMC), Product School, 2024
Artificial Intelligence Product Certification (AIPC), Product School, 2025

CORE SKILLS

Product & Program: Agile/Scrum, sprint and release planning, requirements gathering, user stories, backlog support/prioritization, roadmap planning, risk identification and mitigation, stakeholder communication, cross-functional coordination

Quality & Technical: Software QA/testing, functional testing, usability testing, data validation, test planning, SQL, release readiness, defect management

AI & Tools: Claude, Gemini, Nano Banana (AI image generation), Canva AI-assisted design, JIRA, Data Visualization and reporting

PROFESSIONAL EXPERIENCE

ECLAT - Founder/Product & Operations Lead (Self-Funded, Pre-Launch Apparel)	San Jose, CA 2024 - Present
- Develop product concepts into manufacturable specifications and execution plans, coordinating directly with sourcing and manufacturing partners on materials, sampling, production timelines, quality expectations, and cost targets. - Plan inventory and supply-chain workflows, including minimum order quantities (MOQs), vendor coordination, delivery sequencing, and production feasibility within self-funded constraints. - Manage product-level budgets across development, sampling, and production while maintaining structured product specifications, timelines, and cost documentation to support repeatable execution.	

Product / Program Delivery - Morgan Stanley / E*TRADE (CTS)

Menlo Park, CA | Jun 2021 - May 2022

- Supported product and program delivery for the E*TRADE trading platform, collaborating with engineering, QA, and operations teams across financial application releases.
- Translated business and delivery needs into requirements and user stories; supported sprint planning, backlog Prioritization and release coordination contributed to a 20% reduction in delivery delays.
- Tracked delivery status, reliability risks, dependencies, and release readiness; communicated progress and issues to stakeholders to support timely decisions, platform stability, and regulatory compliance.
- Partnered with engineering and QA teams to investigate issues, validate releases, and support improvements to the digital user experience.

Program Manager - Apple Inc. (Infosys)

Sunnyvale, CA | Mar 2020 - Apr 2021

- Supported cross-functional program delivery for Apple Store App initiatives, coordinating engineering, product, QA, and operations stakeholders across software release cycles.
- Managed program plans, sprint/release tracking, dependencies, risks, and status communication while translating business workflows and requirements into actionable delivery items for technical teams.
- Combined program management with hands-on testing and release-readiness activities, coordinating quality reviews and validating those releases met functional and user-experience expectations.
- Facilitated issue resolution and stakeholder alignment during release cycles, escalating risks and maintaining clear documentation to support consistent delivery.

Software QA Tester - Infomatrix Global Inc.

Denver, CO | Mar 2018 - Feb 2020

- Tested interactive web and mobile applications through functional, usability, regression, and data-validation activities across software release cycles.
- Created and executed test plans, documented defects, validated backend data using SQL, and partnered with developers to reproduce and resolve application issues.
- Collaborated with product managers, designers, and engineering teams to clarify expected behavior, improve usability, and strengthen release quality.
- Contributed to QA process improvements and release-readiness practices that supported more consistent software delivery.

SELECTED PRODUCT & BUSINESS EXPERIENCE

- Applied product management frameworks through MBA coursework and Product School training, including customer/market analysis, segmentation, value proposition development, product strategy, metrics, and go-to-market decision-making.
- Developed AI product knowledge through Artificial Intelligence Product Certification and practical use of generative AI tools for research, ideation, content development, and workflow support, no claims of ML model development or production LLM ownership.
